# Vaibhav Bisht

## Software development student + family-business operator

Tallinn, Estonia vaibhavbisht.1911@gmail.com github.com/Xenitro-1911 www.linkedin.com/in/vaibhav-bisht-est vaibhavbisht.vercel.app

Open to entry-level roles in Tallinn.

### PROFILE

I am a second-year Software Development and Entrepreneurship student at Mainor University in Tallinn. I graduate in June 2028.

Alongside my studies I help run Buddha's Restaurant and Bella's Café & Grill, two family restaurants in Paide and Kose. I write the software they need: websites, menus and a point-of-sale system.

### EXPERIENCE AND EDUCATION

**Operations and software, Vaishnavilnvest OÜ (Buddha's Restaurant, Bella's Café & Grill)** Paide and Kose, Estonia

I help run my family's two restaurants, covering operations, suppliers, staff scheduling and the tech behind them.

- Opened the new Kose location: supplier sourcing, fit-out and food-safety inspection prep.
- Built a trilingual (English, Estonian, Russian) menu with 74+ items, allergen pages and QR codes.
- Designed weekly lunch menus for social media and A4 print.
- Built staff rosters that comply with Estonian labour law (TLS).
- Evaluated POS systems, compared supplier prices and took over invoice handling.

**Student, Software Development and Entrepreneurship, Mainor University**

2nd year, graduating June 2028 · Tallinn, Estonia

Second-year degree combining software development with running a business.

- Submitted the Intermodal Trip Planner to the Bolt Graduate Programme.
- Built the University Learning Platform System in Java with Maven and JUnit 5.

### PROJECTS

**Buddha's Restaurant website** Website

Rebuilt the restaurant's site for its Paide and Kose locations, with a gift-card promotion.

www.buddhasrestaurant.ee

**billing_pos** Full-stack POS

Restaurant point-of-sale system with Estonian VAT and region support. Includes "Kasa", an Electron desktop prototype.

FastAPI, Next.js, PostgreSQL, Electron

In development

**University Learning Platform System** Java system

Learning platform system written in Java and covered by JUnit 5 tests.

Java, Maven, JUnit 5

github.com/Xenitro-1911/University-Learning-Platform-System

**bellascafeandgrill.ee** Website

Rebuilt the café's website from scratch.

Next.js, TypeScript, Tailwind

bellascafeandgrill.ee

**Intermodal Trip Planner** Web app

Trip planner built for the Bolt Graduate Programme. Live on Vercel.

intermodal-trip-planner.vercel.app

**Java LeetCode practice** Practice repos

35 Easy and 7 Medium LeetCode solutions in Java, each with clean code, complexity notes and unit tests.
