Vaibhav Bisht

Software development student + family-business operator

Tallinn, Estonia vaibhavbisht.1911@gmail.com github.com/Xenitro-1911 portfolio-rose-beta-4jmpryazcn.vercel.app

Open to entry-level roles in Tallinn.

PROFILE

I am a second-year Software Development and Entrepreneurship student at Mainor University in Tallinn. I graduate in June 2028.

Alongside my studies I help run Buddha's Restaurant and Bella's Café & Grill, two family restaurants in Paide and Kose. I write the software they need: websites, menus and a point-of-sale system.

EXPERIENCE AND EDUCATION

Operations and software, VaishnaviInvest OÜ (Buddha's Restaurant, Bella's Café & Grill) Paide and Kose, Estonia

I help run my family's two restaurants, covering operations, suppliers, staff scheduling and the tech behind them.

- Opened the new Kose location: supplier sourcing, fit-out and food-safety inspection prep.
- Built a trilingual (English, Estonian, Russian) menu with 74+ items, allergen pages and QR codes.
- Designed weekly lunch menus for social media and A4 print.
- Built staff rosters that comply with Estonian labour law (TLS).
- Evaluated POS systems, compared supplier prices and took over invoice handling.

Student, Software Development and Entrepreneurship, Mainor University

2nd year, graduating June 2028 · Tallinn, Estonia

Second-year degree combining software development with running a business.

- Submitted the Intermodal Trip Planner to the Bolt Graduate Programme.
- Built the University Learning Platform System in Java with Maven and JUnit 5.

PROJECTS

Buddha's Restaurant website Website
Rebuilt the restaurant's site for its Paide and Kose locations, with a gift-card promotion.
In development

billing_pos Full-stack POS
Restaurant point-of-sale system with Estonian VAT and region support. Includes "Kasa", an Electron desktop prototype.
FastAPI, Next.js, PostgreSQL, Electron

University Learning Platform System Java system
Learning platform system written in Java and covered by JUnit 5 tests.
Java, Maven, JUnit 5

bellascafeandgrill.ee Website
Rebuilt the café's website from scratch.
Next.js, TypeScript, Tailwind
bellascafeandgrill.ee

Intermodal Trip Planner Web app
Trip planner built for the Bolt Graduate Programme. Live on Vercel.
intermodal-trip-planner.vercel.app

Java LeetCode practice Practice repos
Structured Java repositories of LeetCode solutions.

SKILLS

Languages: Python, TypeScript, Java

Backend and Data: FastAPI, PostgreSQL

Spoken: English, Estonian (learning), Hindi

Web: Next.js, React, Tailwind, Electron

Tools: Git / GitHub, Maven, JUnit 5
